You may then press SPEAKER to end your session. To set Call Forwarding – No Answer, press FWD-NA or dial the Call Forwarding – No Answer access code. In North America, the North American Numbering Plan (NANP) generally uses the following vertical service codes to control call forwarding: Forward service Activation Deactivation Number change All calls *72*72[1+e number] (some larger cities) *73 On busy or no answer *68 *81 From select callers *63 *81 On ISDN *56 Customer-programmable features (where available): Busy line *90 *91 *41 No answer *92 *93 *611 The Sprint Nextel cellphone company uses these:[3] Forward service Activation Deactivation On busy or no answer *28[phone number] *38 On busy *74[phone number] *740 On no answer *73[phone number] *730 Immediately *72470473277 5 *720 As of January 2012[update], Sprint charges 20 cents per minute for unconditional call forwarding; conditional call forwarding is included, however.[4] Some carriers (including Verizon Wireless) use *71 for conditional forwarding although this is not standard.[5] Sometimes, to deactivate call forwarding, *720 will work on cellphones.[citation needed] Most EU fixed-line carriers use the following codes based on CEPT and ETSI standards developed in the 1970s on both POTS and ISDN lines. ^ "GSM feature codes". Dial the outside ... How to forward your phone to an outside number or an extension: 1. Before the availability of call forwarding, commercial answering services needed to physically connect to every line for which they provided after-hours response; this required their offices to be located near the local central exchange and be fed by a huge multi-pair trunk in which a separate pair of wires existed for each client subscriber. Press the Speaker button 2. The forwarding will be re-activated to the number registered in the network. 16 character, 2-line LCD with 4 Status IconsDistinctive Ringing . At night, the calls on lines 1-4 must automatically route to the technician on call for emergency service. You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable exception or limitation . Archived from the original on 2010-09-06. When a call rings the forwarded extension, the NEC DSX phone system selects the specified line or group and then out dials the stored number. The terms call forwarding and call diversion are not used to refer to any feature that allows a call to be routed to a third party, and the terms are generally interchangeable. Follow these steps to set Call Forwarding on your NEC phone. Conditional call forwarding only works when the conditions set by the customers met while Unconditional call forwarding works in all cases irrelevant of network coverage. Dial 6 and the trunk access code. Share — copy and redistribute the material in any medium or format for any purpose, even commercially. In GSM networks of some US carriers, and in all mobile networks in Europe, it is possible to set a number of seconds for the phone to ring before forwarding the call. In Europe, most networks indicate that unconditional call forwarding is active with a special dial tone. Dial 741 3. It is possible to activate the feature to a number other than the registered number, while still retaining the registered number for later use. If you are setting this feature for another station, press SUBLINE APPEARANCE. The license may not give you all of the permissions necessary for your intended use. If you don't have OffP as an option then your extension's class of service does not allow off-premise forwarding.Press the softkey under Num.Enter 90 for the Line/Group/Intercom and press HOLD: This is where you tell the phone system what line to dial out on. Next, dial the destination station or the external phone number, and then you should hear the Service Set tone. There are two methods for doing an off-premise forward, tandem trunking or flash transfers.Tandem trunking uses two phone lines, one incoming line and one outgoing line, to transfer calls to an off-premise number. Call forwarding typically can redirect incoming calls to any other domestic telephone number, but the owner of the forwarded line must pay any toll charges for forwarded calls. This feature allows your service department dispatcher to forward the calls to an off-site location (such as a cell phone or remote office). Support and Services. A business located in such a suburb may therefore benefit from obtaining a downtown number as an "extender", to be permanently forwarded to their geographic suburban number. When using Tandem Trunking you want to make sure that you have the phone company feature disconnect supervision (sometimes called far-end disconnect or gauranteed disconnect) on your lines, otherwise your lines might stay tied up after the conversation has finished.Flash Transfer is the preferred method for transferring calls off premise. The number should be entered the same as if you were dialing it from one of the NEC DSX phones.Press the Service Set tone and the LED will turn off at your station, or at the Dterm of the subline station. ^ "Find out more about call forwarding". Start by pressing SPEAKER and you should hear a dial tone. Retrieved 2011-10-26. Canadian Patents Database. No additional restrictions — You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits. Call forwarding can also assist travelers who do not have international cell phone plans and who wish to continue to receive their voicemails through VoIP easily while abroad. This is specified by inserting "*SC*XX" prior to the final "#" of the forwarding command, where "SC" is a service type code (11 for voice, 25 for data, 13 for fax), and "XX" is the number of seconds in increments of 5 seconds. Press 1 to set call forwarding 4. Some services offer international call forwarding by allocating for the customer a local virtual phone number which is forwarded to any other international destination. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use. You should then hear a special dial tone. You may also connect with us on Facebook, Google+, Twitter, LinkedIn, and Pinterest for updates. Currently this implementation of off premise forwarding only works with the tandem trunk method.Programming:Note: This method will only work if a caller is transferred directly to OR directly dials your extension number, this will not work on KEY RINGING Calls or group calls.With the handset down press Intercom * 3Press the softkey under Mۦore.Press the softkey under OffP. If "SC" is omitted (just "*#XX") then by default all service types will be forwarded. If after that the forwarding is deactivated using a command with a single "#", then later it will be possible to re-activate this forwarding again with a simple "*" command without a phone number in it. However, if later a command is issued: *62# then the calls will again be forwarded to the registered number 7035551212 (and not to the number from the previous forwarding command 7185551212). A flash transfer transfers the caller back out on the same line they called in on, thus removing the call from your phone system and freeing that line for another incoming caller. As a means to obtain an inbound number from another town or region for business use, remote call forwarding schemes tend to be far less expensive than foreign exchange lines but more costly than using voice over IP to obtain a local number in the chosen city. Retrieved 2010-05-22. ^ "iPhone 4S/Call Forwarding". . This feature requires a subscription from the telephone company. To cancel Call Forwarding – Busy, press FWD-BY or dial the Call Forwarding – Busy access code. Press TALK + HOLD.26 ◆ Chapter 2: FeaturesDS1000/2000 Cordless Telephone User Guide Forwarding all of your calls to an external number is best accomplished by using the phone company forwarding option but if that feature is not available the NEC DSX can be programmed to forward calls for you. VOIP and cable telephone systems also allow call forwarding to be set up and directed via their web portals. Tips and Secrets. .3.Dial 4 to return your extension to your group, or Dial 6 to remove your extension from your group.Page 2Feature OperationForced Trunk DisconnectForced Trunk Disconnect is disabled by default.To disconnect a busy outside line:1.Press line key for busy outside line.0Press TALK and dial the line key.Line Access Code (e.g., 101 for line 1).2.Dial # to disconnect the line.3.Press line key and dial the number you want to call.Group Call PickupGroup Call Pickup is disabled by default.To answer a call ringing a phone in your Ring Group:1.Press TALK and dial *#.0Press the flashing Group Pickup key.Group RingGroup Ring is disabled by default.To place an outside call on System Hold:1.Press HOLD.-The line key flashes fast to indicate that it is on Hold.-The line will recall with a distinctive "wink-on" flash rate if you leave it on Hold too long.To place an outside call on Exclusive Hold:1.Press HOLD twice.-The line key flashes with a distinctive "wink-on" flash rate to show when it is on Hold or recalling.To place an Intercom call on Hold:1.Press HOLD.To pick up an Intercom call on Hold:1.
