Who are we

Scope	Our scope is to provide our customers with integrated technical services from design to construction, renovation and maintenance of their premises.
History	Proektasis Techniki was established in August 2004 as an Engineering consulting company. However, we rapidly expanded our activities to maintenance and construction providing our customers with a wide range of technical services.
Services	<p>Our range of services includes:</p> <ul style="list-style-type: none">✚ Upgrade and Renovation of existing buildings✚ Facilities management✚ Provision of specialized technical services – Energy saving✚ Supply and installation of innovative safety solutions
Sectors	Our customers portfolio covers various sectors of the economy including retail, restaurants, oil industry, hospitals, municipalities, schools, social services as well as a large number of independent professionals (for more information about our customers portfolio you can visit our website www.proektasis.gr).

Our Values

Client-side thinking	Our flexible operational structure ensures we can provide a tailored service delivery model that can adapt to our clients' needs as their organisations evolve.
People	The people who deliver our services and who represent us to our clients are key to our success. Our well trained, enthusiastic and motivated team enables us to delivering exceptional service.
Quality	We use the best materials and technicians with sound experience in order to ensure the best quality result in our works.
Health and Safety	Health and Safety is a top priority in all aspects of our activities.

building and fabric maintenance

Maintaining a building is far from easy. Our dedicated team is here to support in any problem from a leaking roof to a burst pipe.

What we do:

Painting, floors and roof repairs, plumbing, door/lock repairs, stair repairs, drainage, ceiling tiles, redecoration, carpeting, glazing repairs, carpentry work and furniture and fittings repair & maintenance.

Mechanical and electrical maintenance

Proper, constant and safe operation of mechanical and electrical installations is vital for the effective operation of commercial building. Our scope is to prevent the faults before they arise.

What we do:

Maintenance and control of all M&E plant and equipment including critical power, cooling, lighting, heating, air-conditioning, ventilation systems, LV and HV electrical distribution, boiler maintenance, generators, fire and intruder alarms, CCTV, lifts and escalators and water treatment.

specialized technical works

When special technical skills and experience are required we have the knowledge and expertise to do it.

What we do:

Heating and thermal insulation, special floorings (industrial, parking areas), metallic and stainless constructions, fencing, fire safety installations, energy saving solutions (heating, water renewables)

planning and design

With cooperation with experienced architects and decorators we can propose you the best solutions to make your working life better and save you money.

We offer a full range of services from design and fit-out, office refurbishment & interiors to consultancy, space planning and design.

We also support you issues regarding your premises and public authorities and local laws and regulations.

renovation , interiors

Whether you are relocating to bigger premises, downsizing to smaller ones or simply restructuring your existing accommodation to get the most out of it – we're here to help.

What we do:

Partition installations, suspended ceilings, flooring, window and door frames, glazing, plumbing, electrical installation, HVAC, CCTV.

improve energy efficiency

Upgrade the energy efficiency of a building not only reduces energy consumption but also increases the value of it.

What we do:

External thermal insulation (thermoprosopsis), replacement of wooden door and window frames with aluminum or PVC made, replacement of glazing with double glazing, roof gardens.

A-SAFE PROTECTIVE BARRIERS

PROEKTASIS TECHNIKI is an approved Reseller for A-SAFE barriers (UK) in Greece (www.asafe.com).

A-Safe is the most innovative safety barrier system ever. So innovative in fact, that it effectively makes conventional steel barriers obsolete.

The secret of A-Safe's success lies in the polymer-based material that all the products in the range are made from. Unlike steel, which simply dents or crumples when a vehicle hits it, an A-Safe barrier will spring back into shape, thanks to its built-in memory. Naturally, this greatly reduces the need for damage repairs, both to the barrier and to the vehicle itself.

A-SAFE barriers need no repainting, they cause no damage to the floor and the vehicle thus greatly reducing the maintenance cost and extending product life cycle. They can be used in car parking areas, warehouses, production areas as well as in any area there is an need to protect building structures, equipment and people from vehicles.
